To Whom It May Concern:

I am delighted to write this letter in strong support of **Mr. Ashim K.C.** for advanced study and professional opportunities in computer science and artificial intelligence. I worked closely with Ashim over several months on a co-authored research manuscript, and I came away impressed by his persistence, curiosity, and follow-through.

Ashim combines solid technical skill with a serious work ethic. During our collaboration on the *LLM Ensemble* paper, he responded to detailed, line-by-line feedback across multiple revision cycles—expanding outlines into full prose, clarifying methodology, adding exemplars and rubric detail, and tightening the results narrative. He met deadlines, asked focused questions, and iterated quickly without sacrificing care or accuracy. That blend of humility and grit is rare.

Beyond the manuscript, Ashim brings hands-on engineering experience (backend development, API design, and AI integration) and collaborative leadership. He has contributed to production-grade projects (e.g., Django- and FastAPI-based systems with modern ML tooling) and helped convene an AI learner community, where he shares practical insights with peers. Taken together, these experiences show a student who can bridge research and implementation—someone who writes clearly about ideas and then builds them.

I am confident that Ashim will thrive in graduate-level and professional settings. He is dependable, intellectually honest, and intrinsically motivated. I recommend him with enthusiasm and without reservation.

If you have any further questions about my experiences with Mr. K.C. or his qualifications, please feel free to contact me via email at edwardm2@miamioh.edu.

Sincerely,

Michael Todd Edwards, Ph.D.
Armstrong Professor of Education, Health, and Society
Editor, *Ohio Journal of School Mathematics*
Co-Founder, *Technology Educator Alliance (TEA)*
