SUMMARY

Aspiring AI Engineer with experience in backend development and over a year working on Software and AI. Interested in building practical AI solutions and integrating them into software systems.

EXPERIENCE

Web Development Intern: **SmartSites** | Jun 2024 - August 2024

- Built and maintained dynamic websites using **Python**, **PHP**, and **MySQL**
- Handled backend logic, database design, and WordPress plugin customization
- Collaborated with clients to implement features and ensure smooth site performance

Research and Development Intern: **Codynn** | Jan 2024 - May 2024

- Conducted research on ML and **recommender systems** to support product innovation
- Created educational content on AI and tech topics
- Collaborated with the team to apply research in real-world learning tools

PROJECTS

Staff-tech - Resume analyser and HR helper

- Leveraged **LLM** to parse resumes and provide feedback to the candidate.
- Implemented **RAG**-based **Agentic** chatbot for managing HR workload.
- Django, AngularJS, **Langchain**

Upstart - An online marketplace

- Built a secure online marketplace using **Django** with **JWT** auth and email verification
- Integrated a **hybrid recommender system** for personalized product suggestions
- Implemented lexical search and managed full backend workflows, including user and transaction management

Rentmandu - An online rental platform

- Built and managed core backend systems in **Django** for designing **RESTful APIs**, including property listings, bookings, authentication, and payment tracking.
- Led **team coordination** and used tools like **PostgreSQL**, **Redis**, and **Celery** for efficient data handling and background task management.

PUBLICATIONS

LLM Ensemble: Multi-LLM Framework for Creative Mathematics Problem Generation

Ohio Journal of School Mathematics (Under Review)

Rohit Khadka, Ashim Khatri

Conducted under the guidance of Prof. Michael Todd Edwards, this project proposes a multi-LLM system to generate curriculum-aligned, cognitively rich math problems. The journal funds the research to support LLM experimentation and development.

Developed a web **application** in **FastAPI** and **React.js** as a prototype application that includes asynchronous model querying, prompt routing, and response aggregation.

TECHNICAL SKILLS

Languages: Python, C, Java

Frameworks: Django, PyTorch, fastai, FastAPI, Streamlit, CrewAI, Langchain, LangGraph

Tools: Git, Docker, Postman, PostgreSQL, MySQL, MongoDB, Google Firestore, AWS (basic), Jira, VS Code, Redis, JMeter, Openrouter, HuggingFace

Skills: System Design (Basic), DevOps(Basic)

EXTRACURRICULAR ACTIVITIES

- **Leading the AI community** "[DevCorps AI Learners](#)" for the past year. Led sessions and meetings on AI and software development. Organized events and workshops, showcasing leadership and team coordination
- Wrote blog posts on [Medium](#), sharing insights from hands-on experience and exploring emerging AI and software technologies

EDUCATION

Herald College, Kathmandu | **B.(Hons) in Computer Science** | 2023 - 2026

St. Xaviers School | **10 + 2** | 2021 - 2023

CERTIFICATIONS AND BADGE

[\[Link\]](#) **AI Engineer for Data Scientist Associate** | datacamp

[\[Link\]](#) **Data Analysis with Python** | freecodecamp

[\[Link\]](#) **Postman API Fundamentals Student Expert** | Postman

LANGUAGES

Nepali (Native), English (Working proficiency), Hindi (Working proficiency)
